

Harvesting- Trees are sustainably cut down into logs and placed onto lorries for transport.

Sawing and Processing – logs are cut into planks and treated to stop pests.

Drying & Curing – Wood is dried and cured in high heat to stop it warping and shrinking.

Craftmanship – Wood is carved and shaped into parts of a table using tools, and put together.

Varnishing – Wood has a layer of varnish applied to change the colour.

Finished product – Table is now complete and ready for purchase.
